Item no. 9181

<b>Designation</b>	Sliding joint profile for thermal insulation 6 mm, bottom
<b>Description</b>	Profile combination for creating sliding joints on thermal insulation systems.
<b>Line of Business</b>	Plaster
<b>Productclass</b>	Profiles for thermal insulation
<b>Productgroup</b>	Expansion / Movement joint profiles
<b>Plaster thickness</b>	6,0 mm
<b>Material</b>	Aluminum natural
<b>Product length</b>	250,0 cm
<b>Reaction to fire (R2F)</b>	A1
<b>Packaging Unit</b>	20 BAR / 154 BUN

## Commentaires / Characteristics

Insert the lower part of the combination 9181/2151 with the fastening leg on the upper edge of the insulation panel, which runs parallel in height with the joint or the plain bearing in the building body, and lightly apply the adhesive. An 8-mm thick styrofoam strip with a compliment will be applied to the base. Place the base profile on the polystyrene strip and attach to the substrate. Mount the perforated 9182/2152 clip-on profile once the insulating board has been placed. Arrange profile joints underneath one another in a staggered manner. Sub-divisions and perforated attachments are designed for organic and mineral plaster constructions. Counterpart for 9182 or 2152.
