7.8

Contents

< 5% non-ionic surfactants, perfumes, BENZYL SALICYLATE, METHYLCHLOROISOTHIAZOLINONE AND METHYLISOTHIAZOLINONE (3:1)

Storage and transportation

36 months of storage stability. No hazardous material according to ADR. Store and transport between +5 to +25°C. Protect from frost.

GISCODE

GU50

Application

- Shake the contents well.
- Observe general and, if necessary, product-specific occupational health and safety regulations. Further information can be found in the GISCODE-related operating instructions which are available under www.wingis-online.de.

Thinner / Mixing

Water.

Application tool / application rate

LOBA mop. On large areas, use a suitable flat wiper mop or a scourer-vacuum machine. / Depending on the application, add approx. 100 - 200ml to a bucket with 10 l of water, sufficient for 100 m².

TECHNICAL INFORMATION

LaminateCleaner

Application

Application:

Mix the cleaning concentrate with water, using a higher ratio for heavier soiling. Damp-wipe the surface with cleaning solution using a suitable cleaning device.

Using too much water and allowing the product to work for too long can cause swelling of laminate flooring, especially in the joint areas, and must therefore be avoided.

The product is also suitable for use in scourer-vacuum machines.

General guidelines

Cleaning of tools: Clean tools and equipment immediately with water.

The information in this document and all other advice and recommendations that we provide to help and assist the applicator are based on previous experience and relate to Spezial conditions. Because of the wide range of possible uses and conditions of application of our products, we do not relieve users from the need to carry out their own trials or to seek technical advice by speaking to the LOBA application engineering department. Observe the floor covering manufacturer's recommendations and the provisions of the current standards.
