

Megamur Style Care Treatment

Product description:

Additional transparent protective coating based on polymer wax in the MEGA 680 Megamur Style Walls and Floors Filler System. The treated surface is easier to care for and is given a classic surface appearance.

Application:

As an extra protective coating against premature soiling of the newly constructed surfaces. Durability (e.g. against premature signs of wear) is prolonged significantly. MEGA 684 Megamur Style Care Treatment should be applied before occupying the rooms.

Properties:

- crystal clear
- classic surface appearance
- easy to clean
- prolongs the durability of the sealing

Please observe:

MEGA 684 Megamur Style Care Treatment can be applied as early as 16 - 24 hours after the sealing is applied.

Material basis:

Polymer wax

Spec. weight:

approx. 1.02 g/m³

pH value:

approx. 8.5

Shade of colour:

Wet = milky

Dry = transparent

Packaging size:

1 l

Consumption:

approx. 1 l/60m²

Drying process:

Can be walked on after approx. 2 - 3 hours

Load-bearing after approx. 12 hours

Storage:

Cool, dry, frost-free. Unopened container can be stored for at least 12 months.

Information on disposal:

For disposal, please observe the legal regulations.

Product code:

Ö20

Hazard warnings and safety instructions:

In the case of contact with eyes, immediately rinse thoroughly with water and consult a physician. Keep out of the reach of children. If inhaled/swallowed, consult a physician immediately and have safety data sheet at hand.

Observe the safety data sheet and care instructions!
